FRESH START FAQS

Everything existing holders need to know about Legacy BDAG, New BDAG, reinstatement, Stage 1, utility, liquidity, mining and launch security.

94	150B	$0.002	$100M
QUESTIONS	NEW BDAG CAP	STAGE 1	PLANNED LIQUIDITY

THE MESSAGE TO REMEMBER

You keep Legacy BDAG. Eligible existing holders receive New BDAG without paying again. Buying more is optional.

QUESTIONS 01-08

Clear answers for existing holders and new participants.

Q01 What is the BlockDAG Fresh Start?

BlockDAG is introducing New BDAG as the native coin for the network's next phase. Existing holders keep their Legacy BDAG and receive an eligible New BDAG allocation without buying again.

Q02 Why are you doing another launch?

We learned from the first launch. The Fresh Start lets us launch the native coin with a clearer structure, live products, stronger execution and a planned $100M liquidity commitment.

Q03 Why is this good for existing buyers?

Because you get a second launch opportunity without surrendering the first. Your Legacy BDAG stays yours, while your eligible original coins and purchases give you New BDAG at no extra cost.

Q04 How can I benefit from this?

Your New BDAG allocation costs you nothing extra. After launch and supported trading, you can hold it, use it or sell it. If market demand grows, you may benefit - but profit is never guaranteed.

Q05 Is this really a second chance for free?

Yes. If you qualify as an existing holder, your reinstated New BDAG allocation does not require a new purchase. You supported the first journey, so you enter the new launch with a head start.

Q06 Do I lose my original BDAG?

No. Your Legacy BDAG remains yours. Nothing is clawed back, erased or exchanged away.

Q07 Do I have to buy again?

No. Your reinstated allocation is separate from the presale. Buying more is optional.

Q08 What is the one-sentence explanation?

You keep your old BDAG, receive New BDAG without paying again, and get a second opportunity from the beginning of a new launch.

QUESTIONS 09-16

Clear answers for existing holders and new participants.

Q09 What should I do first?

Open your official BlockDAG dashboard and look at the New BDAG allocation shown for you.

Q10 Are all my coins being reinstated?

All eligible coins recorded under the final published rules are included in the calculation shown on your dashboard.

Q11 Do my original purchases count?

Yes. Your eligible official BlockDAG purchase history is recognised when your New BDAG allocation is calculated.

Q12 What exactly appears on my dashboard?

You will see the New BDAG allocation linked to your eligible coins and official purchase records.

Q13 Exactly how much New BDAG am I receiving?

Your official dashboard shows your personal allocation. That number is specific to your verified records.

Q14 When does my reinstated New BDAG appear?

Your allocation is displayed through the official dashboard as the Fresh Start rollout goes live.

Q15 Is there a claim race?

No. The plan is automatic reinstatement and coordinated distribution, so eligible users do not need to race one another.

Q16 Is there a deadline to claim it?

The allocation is designed to be automatically reinstated. Any final timing or eligibility requirements will be announced only through official channels.

QUESTIONS 17-24

Clear answers for existing holders and new participants.

Q17 Do I need to send my Legacy BDAG anywhere?

No. Never send coins to unlock an allocation. Use only the official dashboard and official instructions.

Q18 What if my allocation looks wrong?

Use the official allocation review process when it opens. Keep your purchase evidence so the team can check the records.

Q19 I bought through an exchange. Do I qualify?

Users who bought BDAG through exchanges do not qualify. Only purchases from BDAG presale are eligible.

Q20 What if my coins are staked, wrapped or on another chain?

Eligible staked balances are intended to be included. Wrapped or cross-chain balances depend on the published snapshot and verification rules.

Q21 I never claimed my original tokens. Am I still eligible?

Eligible official purchase records can still be recognised under the published reinstatement rules. Check your dashboard.

Q22 What happens to the BDAG I already hold?

It stays yours in your wallet as Legacy BDAG. Nothing is removed, reversed or clawed back.

Q23 Will Legacy BDAG be abandoned?

No. BlockDAG intends to keep supporting Legacy BDAG, developing uses for it and pursuing wider market support.

Q24 Will Legacy BDAG still work in the ecosystem?

Yes. Legacy BDAG is planned to remain a supported and usable ecosystem asset.

QUESTIONS 25-32

Clear answers for existing holders and new participants.

Q25 Will Legacy BDAG remain tradable?

It can trade as its own separate asset wherever supported markets are available.

Q26 Will BlockDAG pursue major listings for Legacy BDAG?

Yes. The plan is to continue pursuing broader exchange and market support for Legacy BDAG.

Q27 Does New BDAG replace or erase Legacy BDAG?

No. New BDAG becomes the native network coin, while Legacy BDAG remains a separate asset that you continue to own.

Q28 Will both coins have the same price?

Not necessarily. They are separate assets, so each price depends on its own supply, demand, liquidity and supported markets.

Q29 Why keep Legacy BDAG instead of retiring it?

Because existing holders should not lose what they already own. The Fresh Start adds a new opportunity instead of removing the old one.

Q30 Will both coins be used in the ecosystem?

New BDAG is planned for native network functions. Legacy BDAG remains a supported ecosystem asset with its own uses.

Q31 Which coin should I hold?

That choice belongs to you. Existing holders can own both: Legacy BDAG from the first journey and New BDAG for the next native network phase.

Q32 What is New BDAG?

New BDAG is the planned native coin for BlockDAG network gas, mining rewards and core ecosystem products.

QUESTIONS 33-40

Clear answers for existing holders and new participants.

Q33 Why do we need a new native coin?

It creates one dedicated economic layer for the network's next phase, with supply and allocations built around users, mining, the presale and ecosystem growth.

Q34 What problem does New BDAG solve?

It gives the network a native coin designed specifically for gas, mining rewards and connected BlockDAG products.

Q35 What is the maximum New BDAG supply?

The published maximum supply is 150 billion New BDAG.

Q36 How is the 150B supply allocated?

50B for existing users, 50B for mining rewards, 25B for the new presale and 25B for ecosystem products, growth and adoption.

Q37 Is there a separate team allocation?

No separate team allocation appears in the published 150B split.

Q38 Can the team mint more than 150B?

The published hard cap is 150B. The final deployed contract and audit should enforce and verify that limit.

Q39 Can another New BDAG be created next year?

New BDAG is intended to be the long-term native coin, not a temporary reset. There are no announced plans for another replacement.

Q40 What happened to the original tokenomics?

The Fresh Start introduces a new structure for a different stage of the project: one built around the live network, existing users, miners and ecosystem growth.

QUESTIONS 41-48

Clear answers for existing holders and new participants.

Q41 What is the Stage 1 price?

Stage 1 begins at $0.002 per New BDAG - less than one cent.

Q42 What does $100 buy at Stage 1?

$100 buys 50,000 New BDAG before any applicable bonus. This is an illustration, not a promise of future value.

Q43 How many presale stages are there?

There are 25 increasing stages. Earlier stages have lower prices; later stages have higher prices.

Q44 What is the final presale stage price?

The final stage is planned at $0.05 per New BDAG.

Q45 How long will all 25 stages take?

The exact timing depends on the published sale schedule and stage progress. Official channels will announce every transition.

Q46 Why is Stage 1 a second chance?

Old holders enter with reinstated New BDAG and can optionally add more at the earliest stage before it closes.

Q47 Is the presale compulsory for existing holders?

No. Your free reinstated allocation is not conditional on buying more.

Q48 Why should an existing holder consider buying again?

Only if they want more New BDAG. Existing holders already have a head start; Stage 1 is the optional chance to increase it at the earliest price.

QUESTIONS 49-56

Clear answers for existing holders and new participants.

Q49 Is there an existing-holder launch bonus?

During the announced launch window, eligible existing holders can use Special Key STAGE1 for a 15% New BDAG bonus, subject to the published promotional terms.

Q50 What happens when Stage 1 closes?

The sale moves forward. The $0.002 Stage 1 price is not planned to return once that stage has ended.

Q51 What is the intended launch reference price?

$0.10 is the intended New BDAG launch reference price.

Q52 Is the $0.10 reference guaranteed?

No. It is a launch reference, not a guaranteed exchange price, selling price or return.

Q53 What is the $100M liquidity plan?

BlockDAG plans to provide $100 million in launch liquidity using a combination of presale proceeds and company funds.

Q54 Why does $100M in liquidity matter?

More liquidity can support deeper markets, smoother trading and stronger launch infrastructure than a thin market.

Q55 Does $100M guarantee the price?

No. Liquidity supports trading conditions but cannot stop losses, guarantee demand or promise an execution price.

Q56 Where will presale proceeds go?

They can support the planned launch liquidity and the wider growth, operations and ecosystem plan. The final allocation will follow published disclosures.

QUESTIONS 57-64

Clear answers for existing holders and new participants.

Q57 Can I sell New BDAG after the presale?

Once New BDAG launches and supported trading opens, holders can choose to hold, use or sell it, subject to final terms and available liquidity.

Q58 Can I sell my reinstated New BDAG on day one?

Transferability and trading begin according to the final launch and exchange terms. Confirm the official timetable before acting.

Q59 When will supported trading open?

Supported trading is planned after the presale and New BDAG launch. Exact venues and timing will come only from official BlockDAG channels.

Q60 Can buyers sell immediately and affect the market?

Any open market can have buying and selling. The launch structure and liquidity plan can support the market, but market behaviour cannot be guaranteed.

Q61 Why is this launch different from the first Stage 1?

The first Stage 1 was built around what BlockDAG intended to create. Today, the blockchain and casino are live, miners are being delivered, BlockDAGX is launching and the Super App is in development.

Q62 What becomes the native coin after the presale?

New BDAG is planned to become the native coin for network gas, mining rewards and core ecosystem products.

Q63 What happens to mining rewards?

50B New BDAG is allocated for long-term mining rewards. Final transition timing and reward rules will be published officially.

Q64 Are miners already being delivered?

Yes. Miner deliveries are already underway as part of the wider ecosystem rollout.

QUESTIONS 65-72

Clear answers for existing holders and new participants.

Q65 How much mining allocation enters the market in Year 1?

The release schedule will be published through official tokenomics and mining documentation before launch.

Q66 What is live today?

The BlockDAG blockchain and casino are live, miner deliveries are underway, BlockDAGX is launching and the Super App is in development.

Q67 How do we know New BDAG has real utility?

Its planned utility is directly tied to network gas, mining rewards and core BlockDAG products - not only to presale demand.

Q68 Can Legacy BDAG and New BDAG both be used?

Yes. New BDAG handles native network functions, while Legacy BDAG remains a supported ecosystem asset.

Q69 What proves the project is further ahead this time?

The strongest proof is execution already visible: a live network, a live casino, miner deliveries and additional products moving toward launch.

Q70 What did my original money give me that a new buyer does not have? Your

purchase gives you a reinstated New BDAG allocation without paying again. A new buyer must purchase their position.

Q71 Do existing holders get a better starting position?

Existing holders begin with their reinstated allocation and may optionally add more from Stage 1. With code STAGE1 legacy BDAG holders qualify for a 15% bonus.

Q72 I bought at the top last time. Do I still receive a second chance? Yes. Your

history is considered in the reinstatement calculation shown on your dashboard.

QUESTIONS 73-80

Clear answers for existing holders and new participants.

Q73 Is reinstatement real value or only a dashboard number?

It is an allocation of New BDAG. Its market value begins when New BDAG launches and trades; the eventual value depends on the market.

Q74 If I invested $10,000 before, what is my allocation worth now? Your

coin allocation, not a guaranteed dollar recovery. Its value will depend on the actual market price after launch.

Q75 What if New BDAG trades below $0.10?

Then the market value of your allocation would reflect the lower market price. The $0.10 figure is a reference, not a promise.

Q76 Is this a recovery plan or another fundraising round?

It is both a free reinstatement for eligible existing users and an optional new presale. Old holders receive their allocation without needing to repurchase it.

Q77 Does BlockDAG benefit from the new presale?

The presale funds can support liquidity and ecosystem growth. Existing users still receive the reinstated allocation independently of any optional new purchase.

Q78 Why should we believe this launch can be different?

Because it begins from a more advanced position: the blockchain and casino are live, miners are being delivered, and the plan includes defined allocations and $100M in planned liquidity.

Q79 What went wrong the first time?

The first launch did not deliver the clarity, structure or market outcome the community expected. The Fresh Start is built around those lessons and a stronger execution plan.

Q80 Why have the tokenomics changed?

The project has moved into a new development phase. The new 150B structure separates allocations for existing users, mining, the presale and ecosystem growth.

QUESTIONS 81-88

Clear answers for existing holders and new participants.

Q81 How do we know the $100M will be provided?

The commitment should be supported by transparent launch disclosures and visible liquidity deployment. Until deployed, it remains a planned commitment.

Q82 Will there be an independent audit?

Audits are planned during the presale stage. Confirmed audit details and results should be published through official channels.

Q83 How will supply transparency be protected?

The final contract, hard cap, allocation wallets, release schedules and audits should make the 150B structure verifiable.

Q84 What if I disagree with my allocation?

Use the formal review process, provide your evidence and request a record check before the final distribution.

Q85 Why no separate team allocation?

The public split is focused on existing users, mining, the presale and ecosystem growth. No separate team allocation is listed.

Q86 Is any return guaranteed?

No. The opportunity is the free allocation, Stage 1 access, utility plan and planned liquidity. Market price and profit are never guaranteed.

Q87 Will BlockDAG ask for my seed phrase or private key?

No. Never share them. Anyone asking for them is trying to steal your assets.

Q88 Will I be asked to send coins to unlock New BDAG?

No. Never send crypto to unlock a dashboard allocation or respond to an unofficial wallet address.

QUESTIONS 89-94

Clear answers for existing holders and new participants.

Q89 How do I avoid fake websites and tokens?

Use only official BlockDAG links, check the domain carefully and ignore unsolicited wallet messages.

Q90 Is buying New BDAG risk-free?

No. Digital assets are high risk. Prices and liquidity can rise or fall, and participants may lose money.

Q91 Is the $0.10 reference financial advice?

No. It is part of the intended launch plan, not financial advice or a promise of future value.

Q92 Can everyone participate in the presale?

Participation depends on the published sale terms, eligibility requirements and applicable regional or legal restrictions.

Q93 What should I do right now?

Watch Keynote 6, open your official dashboard and review the New BDAG allocation already shown for you.

Q94 What should I remember?

You keep Legacy BDAG. You receive eligible New BDAG without paying again. Stage 1 is optional - and once it closes, it is gone.
